

# My Brick-Breaker Game

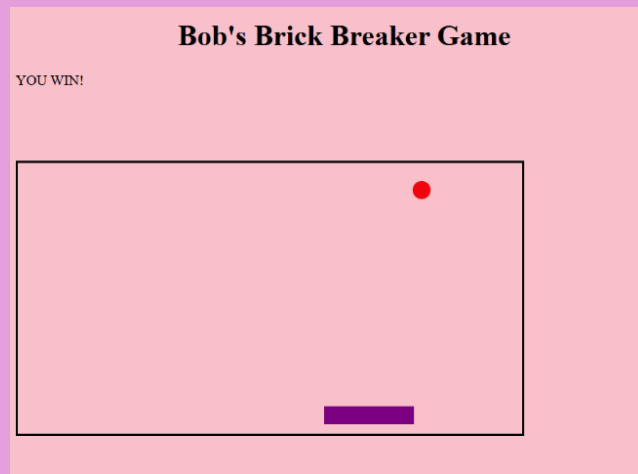

This is my version of the classic brick-breaker game

- You use your keyboards left and right arrow keys to move so that the ball can bounce back up to destroy the bricks
- At the very top left corner, there is a score that represents how many bricks you have currently destroyed
- Object of game is to destroy all the bricks with the ball without letting the ball hit the ground
- You use the paddle to prevent the ball from hitting the ground

- As you can see, I let the ball hit the ground and at the top left corner of the screen, it indicates that I lost

In this image, you can see that I was able to successfully destroy all the bricks, without letting the ball hit the ground

- As a result, at the very top left corner, you can see the message, "YOU WIN!"

---

Thank you for taking the time to view my game

- *Bobby*
